Students Speak

Soumya Das,
BSc. in Media Science
From Guwahati

Entering our Mac Lab and Shoot Floor is quite an experience. I realized how learning can be fun. Faculty members encourage us to do things in our own way. And at the same time guide us so that we can learn quickly. After I got admitted I soon forgot that I had come all the way from Guwahati.

Sagreet Pradhan
BSc. in Media Science
From Darjeeling

Coming from Darjeeling, we were not sure how we would like this college. But we soon made friends and the teachers were very helpful. This place has become another home for us. Learning and extra-curricular activities go hand in hand in our college. What we learn in our classrooms, we practice through our activities. Our faculty members encourage us to think and act on our own.

Sreya Singh
BSc. in Media Science
From Jamshedpur

What I like about our college is that we can express our opinion and argue with our teachers. They patiently hear us and show us our mistakes. We are encouraged to participate in on-campus activities and fests, through which we can showcase our talents and develop team spirit.

Nehal Gurung
BSc. in Media Science
From Siliguri

I do not know much about other colleges, but here we are free to ask questions and express our opinions. We get hands-on experience in shooting and editing, while our faculty members patiently teach us the tricks of the trade. I enjoy coming to college.

Rikparna Sinha Roy
MSc in Media Science
From Kolkata

Learning is made interesting by the way subjects are taught. The library is of great help to students. The teachers guide us and encourage us to pursue our interests. There are lots of events happening on campus and we participate in them and learn to work as a team. The Shoot Floor is where we learn how to read news and conduct interviews.I am lucky that I chose Future Media School for my M.Sc.degree in Media Science.
